

## **STONEFLY AND TARMIN TEAM TO ADDRESS EXPONENTIAL DATA GROWTH WITH NEW HIGH PERFORMANCE ARCHIVER APPLIANCE**

The StoneFly USS™ Archiver Fuses Tarmin's Unique Storage Capabilities With StoneFly's Robust IP SAN Technology to Deliver New Levels of Storage Control, Performance and Value for Medium Sized Organizations

**Silicon Valley, Calif. – October 20, 2011** – [StoneFly](#), Inc. a leading supplier of integrated IP storage area network (SAN) systems has joined with the noted storage innovator, Tarmin, Inc. to deliver the StoneFly USS Archiver Appliance™. A comprehensive solution for the long-term management of unstructured data, the Archiver dramatically lowers data storage costs while powerfully addressing key data management considerations, including, Accessibility, Security and Compliance.

Featuring a complete Object-Based storage framework with rich Metadata management, policy-driven automation and native support for Microsoft Exchange and SharePoint, the Archiver is an ideal solution to a number of requirements.

"Delivering quality turnkey storage solutions is the core of StoneFly," says StoneFly President and CEO, Mo Tahmasebi. "By creating this innovative solution with Tarmin, we are able to offer our market with a sophisticated yet easily manageable enterprise class archiving solution."

"We have built our solution to directly address key challenges and business requirements surrounding the long term management and preservation of significant volumes of unstructured information, said Shahbaz Ali, CEO of Tarmin, Inc. "The Archiver delivers new levels of control and value via our next generation cloud ready architecture. We are pleased to be working with StoneFly and look forward to delivering sustaining value to our channel partners and end- users worldwide."
