

Tarmin Technologies CEO, Shahbaz Ali, to Speak at CERN Sponsored Forum on Virtualization and Grid Computing at the Institute of Physics

Tarmin Technologies Chief Executive, Shahbaz Ali will present on recent research findings by Tarmin in the field of Next Generation File Area Network (FAN) Virtualization technologies at the upcoming CERN sponsored KITE club IT Special Interest Group.

London, UK (PRWEB) September 21, 2007 -- Tarmin Technologies Chief Executive Officer, Shahbaz Ali will present on recent research findings by Tarmin in the field of Next Generation File Area Network (FAN) Virtualization technologies at the upcoming CERN sponsored KITE club IT Special Interest Group.

A noted expert in emerging storage technologies, Mr. Ali will discuss how Virtualization and Grid computing methodologies can assist organizations in classifying and managing vast amounts of data across a heterogeneous range of systems and inputs.

"We have come to a point in time where radical ideas are needed to help us overcome the barriers to efficient management of data stores in the range of 10 Peta bytes and above", notes Mr. Ali. "The CERN Large Hadron Collider (LHC) is a good example, we are entering a period of absolutely massive amounts of data being generated. The systems we create to organize and manage this information pose not only challenges but also opportunities across a wide range of scientific disciplines, especially computer science. I am pleased to be involved in the development of technologies at Tarmin that have a cross applicability, serving the need of both commercial as well as more pure scientific subjects."

About Tarmin Technologies Ltd.

Founded in 2006, Tarmin Technologies is an emerging leader in next generation storage technologies designed to radically reshape the economics of cross platform management of massive data stores. Tarmin is funded by Create Partners, NW Brown Investments and NorthStar Equity Investors and is headquartered in London, UK with a dedicated research and development center in Pune, India and a regional office in San Jose, CA.
